

CareJourney Provider Performance Module

Comprehensive provider performance indicators easily integrated into existing healthcare platforms and applications

Streamline Access to the Industry's Leading Source of Provider Cost and Quality Metrics

The provider performance module offers comprehensive provider performance indicators that combine demographic and affiliation information with cost, outcome, and referral metrics. The rich data supports uses across the healthcare ecosystem, helping organizations enhance the impact of provider relationships, unlock market opportunities, and better coordinate patient care.

Multiple delivery options offer easy integration into back-end or front-end applications to streamline access to timely provider insights. Easily view, share, and consume provider metrics into existing workflows and systems to help inform business and clinical decisions with actionable data.

Robust Data Foundation

The provider performance module is powered by CareJourney's national claims dataset covering 270 million lives and over 2 million providers and includes more than 300 metrics and KPIs for each provider.

STANDARD	PERFORMANCE

Enriched Provider Data Improves Performance Insights

Data-Driven Provider Taxonomy

Leveraging recent provider treatment information we assign clinically-relevant provider subspecialties to help improve “like-provider” comparisons and the identification of high-performing providers best suited to specific patient care needs.

1000+ Unique and Customizable Episodes

Our episode grouper bundles claims data into over 1,000 unique and customizable episodes, helping organizations see each provider’s impact across the full care continuum.

Cost and Quality Metrics

Condition and treatment specific volumes, costs and benchmark insights help you identify high-performing providers, monitor on-going provider performance and make smarter referrals.

Validated Provider Demographics

We routinely source provider demographic information from multiple open data sources, cross-checking details to ensure accuracy.

Provider Performance Data is Core to Network Development, Performance Improvement, and Market Intelligence

Salesforce Health Cloud

The screenshot displays the CareJourney Provider Search interface. The main content area shows three provider profiles:

- Lohr, Loyd A.**: NPI 34285948388, Specialty: Orthopaedic Surgery, Subspecialty: Orthopaedic Surgery of the Spine, CBSA: Phoenix-Mesa-Scottsdale, AZ CBSA. Metrics: Cost Score 4/5, Quality Score 4/5, HCC Score 0.995, Panel Size 241.
- Long, Dee**: NPI 55742672889, Specialty: Orthopaedic Surgery, Subspecialty: Orthopaedic Surgery of the Spine, CBSA: Phoenix-Mesa-Scottsdale, AZ CBSA. Metrics: Cost Score 4/5, Quality Score 5/5, HCC Score 1.238, Panel Size 66.
- Green, Melinda**: Metrics: Cost Score 4/5.

Overlays provide detailed analytics:

- Comparison to Peers**: 66.67%, 82.14%, 38.46%
- Conditions (4)**:

Condition Episode Name
Low Back Pain
Spine Lower Fx/Disloc
Spine Deformity
- Treatments (1)**:

Treatment Episode Name
Lumbar And Sacral Spine Surgery
- Quality Analytics (4)**:

Measure Description
Percent Low Back Pain Compliance
Percent of Physical Therapy before Lumbar Surgery
Percent of Cervical Spinal Surgery without Prior Epidural Steroid Injection
- Cost Score**: 4/5
- HCC Score Table**:

HCC Score	No. of Episodes	Episode Cost	Benchmark
1.197	81	\$3,557	\$4,857
1.385	50	\$862	\$2,989
1.031	26	\$286	\$787

Data Access Options

Snowflake Marketplace

Access the provider profiles and performance data for over 2M providers via Snowflake. Automatically receive updates to seamlessly scale critical data workloads, eliminating the need for cumbersome ETL processes.

Salesforce Health Cloud

Import enhanced provider insights into existing databases and workflows. Automatically update data as provider metrics change, ensuring provider decisions at the point of care are made on the most accurate and current provider information.

“We’d already identified both CareJourney and Salesforce as organizations that share our values and enable Evry’s mission. We’re thrilled to take advantage of their collaboration, which will allow us to remove barriers and build more streamlined workflows with CareJourney provider analytics available natively in our Health Cloud.”

Mark Jamilkowski
CFO and Chief Actuary, *Evry Health*

SFTP

Download select data elements to import into existing applications, workflows and analyses.

“CareJourney’s provider performance module has enriched our internal databases with robust, detailed, and vast provider cost and quality metrics. We can confidently and reliably use these critical metrics and access the data where and when we want, saving us resources and time while providing added insights to our healthcare clients”.

Vivek Gursahaney
Director, Payer Provider Consulting, *Guidehouse*

CareJourney Platform

Licensed users can directly access the provider performance module plus gain access to our Dataverse module, a library of unique datasets created to address specific market questions.

CareJourney Overview

CareJourney is a leading provider of clinically-relevant analytics for value-based care organizations. Headquartered in Arlington, VA, CareJourney currently supports leading payer, provider, and life sciences organizations across the U.S. in achieving their goals by wringing new, high value insights out of expansive population claims data. CareJourney’s cloud-based analytics platform and Data-as-a-service (DaaS) offering help value-based care organizations gain market and cohort intelligence, build and grow networks, improve provider performance, identify leakage and strengthen referrals, and better manage at-risk populations.
